

Performance Testing

Date	4 July 2026
Team ID	SWTID-2026-7566
Project Name	Personalized Networking Assistant
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	Postman, Swagger UI
Type of Testing	Functional & Performance Testing
Target Module / API	Event Analysis, Conversation Generation, Fact Check API
Test Environment	Local (FastAPI + Streamlit)
Test Date	3 july 2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Analyze Event API	1	5	Topics generated successfully
2	Generate Conversation	1	5	Personalized suggestions displayed
3	Fact Check API	1	3	Wikipedia summary returned

4	Feedback Logging	1	2	Feedback stored successfully
---	------------------	---	---	------------------------------

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.2 sec	Pass	Fast response
2	Response Time (Max)	< 5 seconds	2.8 sec	Pass	Within limit
3	Throughput (Req/sec)		18 req/sec	Pass	Stable performance
4	Error Rate	< 1%	0%	Pass	No errors observed
5	CPU Utilization	< 80%	42%	Pass	Normal usage
6	Memory Utilization	< 80%	55%	Pass	Stable Usage Memory

Step 4: Observations & Analysis

Key Findings

- APIs responded quickly during testing.
- All core features worked successfully.

Bottlenecks Identified

- Minor delay during first AI model loading.

Optimization Steps Taken

- Optimized API requests.
- Used modular services for better performance.

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):
