

Project Executable Files

Date	4 July 2026
Team ID	SWTID-2026-7566
Project Name	Personalized Networking Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes

10	Demo video or walkthrough (if required)	No
----	---	----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Personalized-Networking-Assistant/

```

|
|— app/
|   |— models/
|   |— routers/
|   |— services/
|   |— config.py
|   └─ main.py
|
|— frontend/
|   └─ streamlit_app.py
|
|— tests/
|
|— requirements.txt
|— README.md
|— history.json
|— feedback.json
└─ .gitignore
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Local Development
Repository Link	https://github.com/somumukkali39-star/Personalized-Networking-Assistant
Demo Video Link	Not Available

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Prerequisites

- Python 3.10 or above
- VS Code
- Git
- Internet connection

Steps:

Step 1

Clone the repository from GitHub.

Step 2

Install dependencies using:

```
pip install -r requirements.txt
```

Step 3

Start the FastAPI backend:

```
uvicorn app.main:app --reload
```

Step 4

Run the Streamlit frontend:

```
streamlit run frontend/streamlit_app.py
```

Step 5

Open the application in your browser.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Application runs locally only	Can be deployed to a cloud platform in the future
2	No user authentication	Planned as a future enhancement
3	Uses JSON files instead of a database	Can be replaced with MySQL or MongoDB
